DETAILED ACTION***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, *the dispenser* as set forth in Claim 20, line 1, and *a housing* as set forth in Claim 20, line 3 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claims 1-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague and indefinite. On line 17, the phrase “a locking geometry” is unclear. What constitutes a locking "geometry"? What shape and/or structure are applicants trying to claim?

Claim 12 is vague and indefinite. Is the end plug set forth in the preamble of this claim the same or different from “the at least one end plug” set forth in independent Claim 1, line 2? On lines 1-2, the phrase “into a lock mechanism..” is unclear. Is the lock mechanism set forth in this claim the same one set forth in independent Claim 1 or are they two different lock mechanisms?

Claim 20 is vague and indefinite. Is the dispenser set forth in the preamble of this claim the same or different from dispenser set forth in independent Claim 1, lines 1 and 3? On lines 1-2, the phrase “into a lock mechanism..” is unclear. Is the lock mechanism set forth in this claim, line 4 the same one set forth in independent Claim 1 or are they two different lock mechanisms?

Allowable Subject Matter

Claims 1-27 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office.

The following is an examiner’s statement of reasons for allowance:

Claims 1-27 would be allowable over the prior art of record because the prior art of record does not teach or suggest the entire combination of elements set forth including a lock

Art Unit: 3654

housing with a guide slot for insertion of the bearing pin, the guide slot having a first section with a first width and a second section with a second width which is smaller than the first width, the first section and second section sections being arranged in a direction perpendicular to a longitudinal extension of the guide slot and in a longitudinal direction of the bearing pin to be received; a sliding element mounted to the lock housing and movable between a first position closing or narrowing the guide slot and a second position opening the guide slot; a lock element mounted to the sliding element and rotationally movable around an axis of rotation between a locked position and an unlocked position; the lock element being provided with an engagement portion which, in the locked position, is engaged with a locking geometry of the lock housing. None of the references of the prior art teach or suggest the lock mechanism as advanced above and such do not provide the necessary motivation, absent applicant's specification, for modifying the lock mechanism in the manner required by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
